

# CONTACTLESS PAYMENT BASICS

## 01. Look for Mobile Pay Icons.

Keep an eye out for these symbols at participating retailers all over. When you see them at checkout, you and your mobile wallet are good to go.

## 02. Wake/Unlock Device.

iPhone users: Double-click the side button and use Face ID or Touch ID to authorize. Android users: Turn on your screen, then unlock the phone. No need to open the Google Pay app.

## 03. Wave to Pay.

Simply wave your mobile device near the contactless terminal. No cash or card required. Use your mobile wallet app now and wave slow transactions goodbye.

## 04. Payment Approved.

It's that easy. Fast, convenient, safe, secure and protected.
